88 cm.

## TANDEM

FRESHNESS OF CLEANING  
IN LESS THAN 1 m<sup>2</sup>!

**Tandem** combined the washing machine and the tumble dryer in one block but maintaining their independency.

Heating systems, mechanical systems and electronic controls are completely independent. The user can decide to use only the washing machine, only the dryer or both the machine together at the same time.

The washing machines is equipped with 6 detergent pumps for a precise and automatic soap measuring.

The tumble dryer is equipped with reversing drum and electronic drum and suction fan speed control.

Model	Washing Machine cap.ty	Tumble dryer cap.ty	Washing Machine heatings	Tumble dryers Heatings
<b>TDM 1418</b>	14 Kg.	18 Kg.	Electric Direct or Indirect steam	Electric Steam

**Heating:** washing machine and tumble dryer can have the same heating system or combine two different systems.

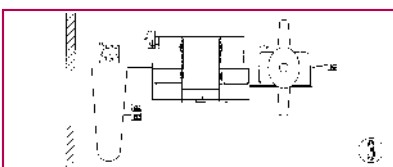

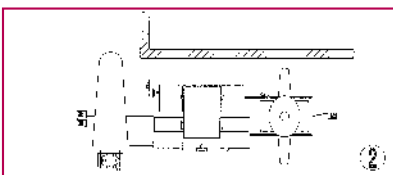

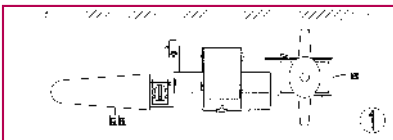

## EASY SHIRT

PERFECT IRONING

Easy shirt is combining in the same machine:

- One self contained form finisher provided with built in electric boiler, water pump and ventilator;
- One vacuum blowing ironing table complete of steam iron and heated swing arm with sleeve form;
- Collar and cuff manual press with polish top buck.

### INSTALLATION EXAMPLE

The system is equipped with a 7,5 Kw built in boiler.

It was designed to fit in any room, for this reason the position of the ironing board can be easily changed.
