

IMESA Wetcleaning System is the water cleaning process as option to solvents.

IMESA Wetcleaning System is the **operational, economical and ecological** alternative to dry-cleaning methods.

OPERATIONAL

Suitable for a wide range of textiles and fibres. It assures hygiene, freshness and a pleasant fragrance.

The right combination of parameters such as mechanical movement, water temperature, detergents and time-cycle, allows several programmes to meet a wide range of needs.

ECONOMICAL

IMESA Wetcleaning System is a life-long investment. Thanks to its wide variety of applications, the minimum water and energy consumption, it holds down the expenses of a traditional dry-cleaning shop.

ECOLOGICAL

Gentle on the environment and careful to safety of operators; by using water, the risks of burns and gas inhalations are definitely eliminated. The environmentally friendly solution to even more restricted rules.
