

	Loading capacity:	7 Kg
	Heating:	Electric
	Drain system:	Drain valve
	G-Factor	390
	Voltage:	3x400V+N 50Hz
	Total installed power:	3,2 Kw
	Machine dimension (WxDXH):	595X595X850 mm
	Net weight	73 Kg
	Packing dimension (WxDXH):	630X660X920 mm
	Gross weight	80 Kg

- ☑ High spin washing machine;
- ☑ Frontal and top panels in stainless steel AISI 304;
- ☑ Self cleaning detergent box with three compartments. Detergent box cleaning each 10 cycles;
- ☑ Hot and cold inlet valve;
- ☑ Huge drain diameter (310 mm);
- ☑ Drum in stainless steel AISI 304 equipped with the new “ActiveDrum” system: the special structure of the drum drive the linen to the central gentle washing area, which is characterized by reduced diameter holes; in this way the linen is treated with the maximum care and the drum balance is better. The drum periphery is characterized by larger holes, which help the residual evacuation;
- ☑ Plastic lifter removable to make easier the drum cleaning;
- ☑ Easy to be used Microprocessor: the selector help to scroll the program list in order to choose the most suitable and start it.
- ☑ “MEMORY” function: the last used program stays on the display;
- ☑ Chosen program characteristics displayed: temperature, spin speed;
- ☑ Count down displayed;
- ☑ Predisposed to coin operation: a coin box can be easily connected to the washing machine, on the top or on the right side;
- ☑ The washing machine can be easily configured for MOP programs;
